	CERCIS CANADENSIS	FOREST PANSY REDBUD	2	5 GAL
	CEANOTHUS	CARMEL CREEPER	9	1 GAL
	LIMONIUM PEREZII	STATICE	9	1 GAL
	WESTRINGIA FRUTICOSA	COAST ROSEMARY	10	1 GAL
	LANTANA SELLOWIANA PURPLE	TRAINING LANATANA	3	1 GAL
	PENNISETUM SETACEUM	RED FOUNTAIN GRASS	1	1 GAL
	ACHILLEA	YARROW	5	1 GAL
	GOLD FINES	GRAVEL	1	
	BOULDER	ROCK	5	

Meadow Theme

The main feature in this front yard is a meadow theme. The lawn area is replaced with a low water use meadow grass, surrounded by drought tolerant plant material with year-round color. The three trees provide shade to a portion of the landscape to reduce transpiration from the plants and evaporation from the soil. The combination makes the landscape water efficient. This garden, with a landscape area of 1,700 square feet, requires about 14,280 gallons of irrigation water per year in the San Benito County area. A landscape of the same size wih high water use plant material would require an additional 23,830 gallons.
